Agriculture**

National Agricultural Library

NATIONAL-FOREST VACATIONS

OPPORTUNITIES for outdoor recreation offered by the national forests cover the entire field of forest-type recreation. For extent, variety, and interest the national forests are probably unequaled anywhere in the world. Furthermore, these opportunities are inexpensive, informal, and relatively undiscovered—open to enjoyment by everyone.

National forests under administration of the Forest Service, U. S. Department of Agriculture, include more than 180 million acres of land, or more than an acre apiece for every man, woman, and child in the United States. Because of their distribution—some 149 in 38 of the 48 States, Alaska, and Puerto Rico—they are the most generally accessible large public areas adapted to outdoor recreation in the country.

Many people do not understand the difference between national forests and national parks. The national parks are administered by the National Park Service of the U. S. Department of the Interior. They were established by Congress, exclusively for the purpose of preserving outstanding recreational, inspirational, and historic values, and making them available for public use and enjoyment. The national forests are managed by the Forest Service of the U. S. Department of Agriculture on a multiple-use basis. All resources of the national forests—water, timber, range, recreation, wildlife, and minerals—are managed carefully and made available for use.

Detailed information on national forests can be obtained from the forest supervisors. Write to them direct for local information and maps.

WHERE AWAY?

ONE of the national forests, and oftentimes several, can be reached from practically any locality in the Nation within a few hours, or, at most, a day's driving time.

Picnicking, camping, fishing, hunting, hiking, and motoring are recreational activities common to all forests. Swimming is offered on most of them; canoeing and boating on the myriad forest lakes and streams—particularly in the Lake States area—are exhilarating pastimes. Pioneer days are relived on pack trips through the vast undeveloped wilderness areas of national forests in the Rockies, Cascades, and Sierras. And winter sports enthusiasts find national-forest winter sports areas and ski runs among the most exciting playgrounds in the Nation.

Scenically and climatically, the national forests are as diverse as the geography of the United States. Ranging from the mysterious cypress swamps and clumps of sand

pinus of the South to the alpine meadows and great fir and spruce forests of the Rockies and the Pacific Northwest and from the spreading hardwoods of the Central States and Appalachian Mountain region to the spectacular, towering redwoods of California, the national forests include timber types representative of every forested section of the country. Geological differences are equally broad, ranging from limestone sinks to glacier-clad peaks and from coastal flats to deep-cut canyons.

There are dense, humid forests and parklike semiarid forests. With the exception of a few units in the deep South and the Lake States, the national-forest system is synonymous with hilly or mountainous terrain—characterized by cool or cold nights and warm, sunny days in summer; bracing, colorful fall seasons; and cold, snow-bound, or blustery winters.

Free Entry.—National forests are open to all who come to enjoy them. There are no charges for entering the forests, but on a few highly improved camp and picnic grounds with season-long caretakers a fee is collected. The regulated sale of forest products and the use of forest lands under permit bring to the U. S. Treasury receipts aggregating approximately 75 million dollars per year, a fourth of which goes to the States and counties in which the national forests lie. An additional tenth is used for roads and trails in the forests.

On some of the more heavily used recreational areas a demand exists for firewood ready-cut into stove or fireplace lengths, for bathhouses at which attendants are on duty, for clothes-checking services, etc. In response to the demand, these special services are often made available for a charge. Use of such services is entirely optional with the individual, however, and in no way restricts free enjoyment of other facilities.

Similarly, on certain national-forest areas under co-operative wildlife management with several Eastern States, special fees are levied for limited hunting and fishing privileges in addition to regular State license requirements. Income from these special fees is used for improving hunting and fishing conditions in the area concerned.

The sign of the national forest is the figure of a pine tree centered in a shield. This insignia usually will be sufficient to point the way, but visitors are expressly invited to stop at the nearest forest supervisor, ranger, or guard headquarters for firsthand information and local maps. A chat with the ranger may make your stay more pleasant. He knows the area—the camping sites and the possibilities for recreation. By consulting him confusion and trouble may be averted.

Because of particularly hazardous fire conditions or for special administrative reasons, the visitor may occasionally bump into “closed to public entry” barriers. Such closures are for the protection of the public as well as of the forest itself. Usually they are of a temporary or emergency nature and in relatively out-of-the-way places where there is seldom any conflict with recreational pursuits.

Fire rules vary by forests because fire hazards vary. Campfire permits are often required, sometimes even at regular camp and picnic areas. See the special rules and suggestions on p. 29 of this booklet.

Also to be noted is the fact that many tracts of land within national-forest boundaries are not in Federal ownership. These lands are private property or State property and trespassing may be forbidden.

F-385237

The ranger knows his forest. Talk to him about your vacation plans.—Gifford Pinchot National Forest, Wash.

F-470724

Picnickers enjoy the beauty and relaxation found at improved forest campgrounds.—Mt. Baker National Forest, Wash.

CAMPGROUNDS, PICNIC AREAS

CAMPERS and picnickers are urged to use some of the sites (approximately 4,400) that have been specially selected and

improved for their convenience and enjoyment.

Facilities include tables and benches, stove or masonry fireplaces, latrines, garbage receptacles, approved drinking water and, in some places, beaches, diving boards, bathhouses, parking areas, and community shelters.

Picnic and campground accommodations provided in the national forests are sufficient to care for 280,000 people at one time. More popular areas have as many as 100,000 or more visitors each year; others have hardly 200 a year. A few of the campgrounds that charge a fee have special provisions for trailers, including special facilities such as water connections or electricity. Trailers are permitted at most other campgrounds but must be used merely as a shelter. Sewage and waste water may not be permitted

to run in the ground. Trailers must be parked so that they do not obstruct normal access along the roads.

A few national-forest campgrounds are so popular that it is necessary to limit the length of stay of each party. At such camps notices of time limits are posted in prominent places.

Accessibility and Location.—Forest camps and picnic grounds are located in the most attractive surroundings the locality affords. They are found in the dense spruce and pine thickets of the Great Lakes region, at the edge of the Arizona desert amid fantastic cacti 40 feet high, on coast lines and lake shores where the surf pounds at the camper's feet, and high in the mountains near glacial streams and alpine flowers that bloom at the edge of perpetual snowbanks. Shade, scenery, a forest environment, and proximity to recreation areas are advantages common to all of them.

The passing tourist would never know, except for the signs, that many well-screened forest campgrounds are within a stone's throw of arterial highways. On the other hand, others may be reached only by traveling the quiet forest roads.

Campers must bring their own tents, bedding, cooking utensils, and food. Near many of the campgrounds are smalltown stores where most of the needed staples can be obtained. However, many other campgrounds are miles from a source of supply. To avoid long, tedious trips for provisions, it is always best to take plenty of food at the outset, if going into out-of-the-way areas.

Some of the camps are open the year round; others are usable only during the summer.

Organization Camps.—On some forests low-rent camps for groups of people are available. Such camps are designed for use by groups whose vacation is made possible through public or organized aid or by 4-H Clubs, Boy Scouts, Girl Scouts, Camp Fire Girls, and similar groups. In some forests religious and social welfare organizations with Forest Service cooperation have already constructed camps and operated them successfully.

Family tent-camping. Many families, such as this one, return year after year to their favorite national-forest vacation spot.—Nantahala National Forest, N. C.

WINTER SPORTS

THE deep snows of the high alpine regions provide excellent skiing in the national forests, and practically all popular ski areas in the

Western States are on national-forest land. The forests of the Lake States and of the White Mountains in New England also contain fine slopes for the ski enthusiast. In the Southwest many ski slopes are within 2 or 3 hours' drive of balmy winter climate!

There are 208 ski areas on the national forests with shelters and ski lifts or tows. Many provide restaurants, resorts, ski schools, and other vacation services operated by concessioners under permits from the Forest Service. There are cleared slopes and ski trails for the beginner and intermediate skier, as well as the country's most famous racing trails for the experienced. Ski lifts and tows are closely supervised and safety measures rigidly enforced.

The National Ski Patrol which searches for lost skiers and renders competent first aid, works in close collaboration with snow rangers who are in charge of most ski areas.

Ski instructors certified by the National Ski Association are available at the large areas. Beginner skiers will have more fun and avoid accidents if they learn to ski under the guidance of an instructor. Well-fitted ski boots and skis are also essential.

The best places to ski are found in the high mountains, where the ski season often extends from November to June. Snow avalanches are a hazard at some of these alpine areas, so heed the advice of the snow ranger or ski patrolmen and stay off slopes which are signed "closed."

For those who enjoy the beauty and stillness of snow-blanketed mountains, there are extensive stretches of ideal

ski touring country. Ski touring is no sport for the novice—it requires competence—never tour alone.

Among the large ski areas on the national forests are:

<i>State and Area</i>	<i>National Forest</i>

Whether expert or beginner, there is a place for you on the abundant ski trails and open slopes in the national forest.—Berthoud Pass, Arapaho National Forest, Colo.

RESORTS, SUMMER HOMES

OF the 505 resorts on national-forest land, only a few, including Timberline Lodge in Oregon and Magazine Mountain Lodge

on the Ozark National Forest in Arkansas, are owned by the United States. All others have been built and are operated by private concessioners under permits whereby the Forest Service regulates the type of development, the character of services furnished, and the charges. Timberline and Magazine Mountain lodges are similarly operated by concessioners.

At many resorts in the national forests, adequate and clean, though sometimes “rugged,” accommodations may be obtained at rates approximating those of the small-town hotel. Those furnishing higher class accommodations or special services, such as saddle horses, charge more.

In addition to resorts on national-forest lands, there are plentiful accommodations at cabin camps, tourist homes,

ranches, and hotels on private lands in and adjacent to the forests.

For information about resort accommodations and rates, write to the National Forest Recreation Association, 2695 Greenwich Street, San Francisco 23, Calif.; local American Automobile Association; American Hotel Association, 221 W. 57 Street, New York 19, N. Y.; Dude Ranchers’ Association, P. O. Box 1363, Billings, Mont.; or local Chamber of Commerce.

Many people write to the Forest Service to know whether or not it is possible for them to have a summer home in a national forest for their own exclusive use. The answer is “yes”—but the home must be located where it will not in any way interfere with or impair public recreational use.

Where it has been determined that there is no reasonable possibility of any demand for recreational uses of a less

exclusive nature, the Forest Service has established areas for summer home sites. To those desiring personal summer dwellings, lots within the zoned areas are leased at the rate of \$25 to \$50 per year. Summer homes erected by the lessees must meet architectural and construction standards set by the Forest Service. There are more than 16,000 summer homes on the national forests—mostly in western forests—at the present time. No summer home permits are issued on certain heavily used forests, like the White Mountain and Green Mountain National Forests in New England.

Inquiries about obtaining a summer home permit should be made to the supervisor at the particular forest on which the permit is desired.

WILDERNESS AREAS

FOR those who yearn for solitude and an outing of real “roughing it,” the wilderness and wild areas—numbering 79—set aside in

the national forests are made to order.

Almost completely undeveloped, free of nearly all artificial influences, accessible only by trail or water, wilderness and wild areas covering in all an area nearly as large as Connecticut, New Hampshire, and Vermont combined have been established in the national forests to be permanently maintained in their original primitive status.

The American Forestry Association, Washington, D. C., sponsors “trail riding” trips through a number of the most outstanding national-forest wilderness areas each year. Prices for these trips (about 10 to 15 days in duration) range from \$150 to \$250 per person—all expenses included.

However, many forest visitors travel in the wilderness areas entirely on their own, either afoot or with horses

rented from nearby ranches.

In some areas a popular mode of travel is with a single burro to pack the camp outfit. Inexperienced

wilderness travelers are strongly advised against long trips without a guide. It is also advisable to notify the rangers where you are going and for how long.

The Superior Roadless Areas in the Superior National Forests are unique canoe wildernesses. These areas are accessible only by canoe and include thousands of miles of wilderness canoe routes.

Saddle and pack horses are available near all wilderness areas and can be hired at about \$5 per day. Guides, who serve as cooks, packers, and horse wranglers, are obtainable at about \$10 per day.

Many people go to wilderness areas from dude ranches. The Dude Ranchers' Association, Billings, Mont., will send information about trips and rates upon request.

F-457032

ROADS AND TRAILS

MOST of the secondary roads in the national forests have been planned and constructed primarily for the purposes of forest protection and development. In general, they are narrower, steeper, more winding, and necessarily slower than the surfaced highways familiar to the average motorist. Nevertheless, if traveled at reasonable speeds and with reasonable caution, they are safe.

Of the more than 139,000 miles of forest highways and forest-development roads thus far completed in the national-forest transportation system, hardly a mile is without some scenic attraction. In locating roads through the forests the route of greatest scenic attraction is always given due consideration. Also, during construction a special effort is made to preserve timber along the roadside in as natural a condition as possible. Unnecessary scar-ring of roadside trees is avoided.

Some national-forest areas of outstanding scenic interest have been made available to motorists by means of specially constructed roads.

Hiking and riding trails in the national forests total approximately 120,000 miles.

The Pacific Crest Trail system, which will eventually stretch 2,265 miles from Canada to Mexico, traverses 19 national forests. Although as yet there is no connected trail route along the 1,000-mile summit of the southern Cascade, Sierra Nevada, and Sierra Madre ranges in national forests of California, 870 miles of the trail in Washington and Oregon are finished, and certain sections of the trail in these States have been equipped with trail-side shelters. More than 1,500 miles of the Pacific Crest Trail are in wilderness areas.

Maps of these completed portions, known as the Cascade Trail and the Oregon-Skyline Trail, can be obtained by

writing to the Regional Forester at Portland, Oreg. No Forest Service map of the scattered sections of the trail through California is yet available.

In the East is the Appalachian Trail, of which some 600 miles cross 8 national forests. Location and marking of the entire route—which extends for 2,050 miles along the crest of the Appalachian Range from Mount Katahdin in Maine to Mount Oglethorpe in Georgia—was completed in 1937.

Shelters and lean-tos are available along this trail at regular intervals. Much of the Appalachian Trail is maintained by local Appalachian Trail clubs who also own many of the shelters. Open shelters are free for anyone to use. Closed shelters may be rented at 50 cents per night per person (minimum fee of \$2.00 for nonmembers), by reservation from the Appalachian Trail Conference, Inc., 1916 Sunderland Place NW., Washington 6, D. C., which also has an excellent “guide” of the entire trail available at small cost.

Less known, but equally inviting, are thousands of other trails in the scenic “back country” of national forests throughout the United States.

F-464978

A forest road through a stand of longleaf and loblolly pines.—Talladega National Forest, Ala.

WATER SPORTS

WITH more than 70,000 miles of streams and thousands of ponds and lakes, swimming and boating in the national forests are popular recreation activities. For those who would explore by canoe, the Superior Roadless Areas of the Superior National Forest in Minnesota offer outstanding opportunities. Sailboats, speedboats, and excursion craft also ply many of the national-forest waters.

As to swimming, the visitor has a wide range of choice—from the warm waters of Florida to the icy water of alpine lakes or streams. In many places the Forest Service has facilitated aquatics through beach improvement, installation of diving boards and rafts, damming streams to raise water levels, bottom grading to remove sharp rocks, and construction of dressing rooms and showers.

Superior National Forest, Minn.

F-451845

F-396810

Mule deer. Deer are the most common big-game animals in the national forests.—Teton National Forest, Wyo.

HUNTING AND FISHING

SPECIES of wildlife in national forests range from the great brown bear of Alaska to the Kaibab squirrel of Arizona and from

the ptarmigan of Colorado to the wild turkey of Carolina. In national-forest waters, fish life ranges from the grayling of Montana to the bream of Alabama and from the muskellunge of Wisconsin to the steelhead of Washington. Not only do the national forests provide at least a part-time home for 55 percent of all big-game animals in the West, but they also afford some of the finest fishing in American waters. Many of the country's best trout waters are in national forests. Cold mountain lakes, clear fast-running streams, and the slower rivers and meandering brooks provide habitat for a wide variety of fish, and fishing opportunities for millions of people.

Most common of all big-game animals in the forests is the deer; second in frequency comes the elk; and others

are the antelope; black, grizzly, and Alaska brown bear; moose; mountain goats; mountain sheep; and peccary. Predatory animals include cougar, coyotes, and lynx, and, in addition, there are many smaller fur bearers. Game birds at home in the forests include blue grouse, ruffed grouse, Franklin grouse or fool hen, quail, wild turkey, and ducks. The national forests are popular with sportsmen as hunting areas for these animals.

State game laws apply to hunting and fishing in the national forests just as they do on surrounding lands. Information regarding open seasons and license fees can be obtained from the State fish and game department of the State in which the national forest to be visited lies. For the convenience of out-of-State visitors who enjoy fishing, a number of States make available special low-cost, short-term fishing licenses.

OTHER PASTIMES

OF ALL outdoor sports mountain climbing is perhaps the most vigorous, fascinating, and sometimes most dangerous. National forests number among their many mountains most of the highest and most precipitous peaks in America. A few of them are difficult enough to challenge even the most expert climbers.

For the photographic hunter the national forests with their well-nigh unlimited scenic views and variety of wildlife and colorful outdoor sports offer untold opportunities. Naturalists will find in the isolation and primitive conditions of the wilderness areas a fertile field for study and discovery.

F-380261

Opportunities for the photographic hunter are almost unlimited.—George Washington National Forest, Va.

In unexplored caves, outcropping rock oddities, and fossil deposits of wide variety there is much to attract the attention of the geologist. The botanist has a range from the strange Cranberry Glades of West Virginia to the great rain forests of the Pacific Northwest, and from the rare flowers of alpine meadows of the Northwest to the scrub pine thickets of the South. And for the amateur mineralogist and prospector the national forests furnish an almost limitless field for exploration.

About 8 million head of domestic livestock, including the natural increase, use national-forest ranges yearly.—Gifford Pinchot National Forest, Wash.

RECREATION—ONE OF MANY NATIONAL-FOREST RESOURCES

NATIONAL forests were established (1) for the protection of watersheds and (2) for the sustained production and use of for-

ests and forest products beneficial to mankind.

Primary purposes of the management of the national forests are briefly: (1) To secure the maintenance of an adequate growth of trees and other vegetation on watersheds in order to aid in preventing floods, maintaining water levels and regularity of stream flow, preventing erosion, preserving waterpower resources, preserving the purity of streams supplying water for domestic use in towns and cities; (2) to provide protection against forest fires, insects, disease, and other destructive agents; (3) to contribute toward maintenance of a permanent timber supply to meet the needs of dependent communities, regions, and the whole country; (4) to serve as demonstration areas of both large and small scale forest management

for private timber owners and operators, including farmers; (5) to secure a sustained supply of forage on forest lands for the grazing of game and domestic livestock; (6) to preserve the beauty and attractiveness of the forests for the recreation and pleasure of the people; and (7) to assist in the broad social program of building a more stable and prosperous Nation.

Public recreation and inspiration are definitely recognized and treated as forest products, taking their proper place in development and management plans.

The distinctive characteristic of national forests is that they are properties managed for the sustained production of a variety of products which, in one way or another, may be harvested. For instance, ripe timber is sold for cutting under practices which insure sustained production; domestic livestock are permitted to graze up to the permanent forage-producing capacity of the land; water is used

in many ways—irrigation, power, domestic supplies, industrial uses, recreation, etc.; game and fish are taken under suitable limitations; and recreation is enjoyed in many forms by millions of people.

All these uses of the national-forest system are handled under a coordinated plan of management known as multiple use. Multiple use means that most of the national-forest areas yield not one but several different crops and services at the same time. Thus, timber harvesting, stock

grazing, various uses of water, hunting and fishing, berry picking, and similar activities may take place at the same time by so adjusting each that it does not measurably interfere with the others. Here and there, of course, some one use may be so important as to give it the right-of-way to the exclusion of the others, and the multiple-use plan provides for this. The controlling objective is to maintain a coordinated pattern of use which will produce the largest net total of public benefits.

WORTH NOTING

1. National forests provide a living for almost a million people and recreation for 35 million or more each year. Under provisions that assure continuity of the forest stand, over 5 billion board-feet of timber are harvested from them annually. The national forests serve as a home for most of our western big-game animals. They furnish part of the forage for 8 million head of domestic livestock including their young. They are the source of domestic water supply for many millions of city dwellers.

2. National-forest visitors can prevent public expense, forest waste, and occasional loss of life, by refraining from “flipping” lighted matches, cigarettes, cigar stubs, and

pipe heels out of car windows or into the brush along forest roads, trails, and streams; by keeping campfires small and by drenching them and testing the embers with bare hands to be sure they are dead before leaving them. On the average 200,000 forest fires are started in the United States each year. Of these 180,000 are man-caused. One-fourth of all fires in the national forests are started by careless smokers—chiefly tourists, campers, fishermen, hunters, and prospectors. One-tenth of all fires are started by careless campers who build their campfires too large or leave them without being positive that all sparks are out. Fire rules are listed on p. 28 of this booklet.

Southern pine sawlogs at lumber mill.—Logs from Sabine National Forest, Texas.

F-46

3. Each year, forest officers spend hundreds of man-days searching for lost persons and rescuing others either injured or killed. Most of those who become lost stray off the posted forest roads and trails or enter undeveloped areas without guides or proper maps. Injuries and deaths occur from inexperience in coping with woods hazards and from lack of proper equipment.

4. Agonizing “lost-in-the-woods” experiences, common injuries, and camper-caused fires can be avoided (a) by going to the forests properly equipped with local maps, shovel, ax, and bucket, stout shoes, warm clothes, and plenty of food; (b) by determining in advance where the nearest forest ranger or forest guard is located so that in case of emergency he can be called upon for help without any loss of time; and (c) by staying on “signed” forest roads and trails unless you know how to take care of yourself in isolated places.

F-437400

Fisherman on North Fork of Feather River.—Plumas
National Forest, Calif.

MINERALS

Minerals are an important resource of the Nation's economy. In the national forests they are disposed of according to the laws applicable. No one law applies to all minerals or to all national-forest lands.

Most national-forest lands west of the Mississippi River were reserved from the public domain (sometimes referred to as public domain national-forest lands), and minerals on these lands are subject to two laws:

1. Oil, gas, oil shale, coal, sodium, potassium, phosphates, and, in Louisiana and New Mexico, sulfur may be disposed of only under permit or lease.
2. Other minerals (except common varieties of sand, gravel, stone, pumice, and cinders) are open to location and entry under the U. S. Mining Laws.

Some large areas of national-forest land are, however, withdrawn from location and entry under the mining laws. Reclamation and power site withdrawals, Federal game

refuges, and land needed and improved for public purposes, such as ranger stations and public recreation areas, are included in such withdrawals.

Most national-forest lands east of the Mississippi River were purchased by the United States for national-forest purposes (generally referred to as acquired national-forest lands) and on these lands minerals may be removed only under permit or lease. These lands are not subject to location and entry under the mining laws.

The Bureau of Land Management is primarily responsible for the administration of all mineral laws, including those applicable to the national forests. Forest supervisors and forest rangers are familiar with the mineral laws applicable to the national forests and will gladly give general information to interested persons.

Persons collecting mineral specimens or rocks as a hobby on the national forests do not need a permit.

RULES AND SUGGESTIONS FOR RECREATION VISITORS ON THE NATIONAL FORESTS

National-forest lands are open for recreation use, and restrictions are imposed only when necessary for the health and safety of users and for protection of the forests.

In times of extreme fire hazard certain areas may be closed to all use. Such closed areas are conspicuously posted.

Campers and picnickers are urged to use regular camp and picnic areas where fire grates, tables, sanitary facilities, and safe drinking water are available.

Campfire permits are required in some forests, even at regular camp and picnic areas (see special fire rules for regions).

General Rules

1. Be sure to check on local fire rules. Read signs and posters. Some areas are closed to smoking or to all travel. Ask the ranger if in doubt.

2. Discharging fireworks is prohibited on the national forests.

3. Build campfires only in safe places and put them dead out with water before leaving.

4. At regular camp and picnic areas build fires only at designated places.

5. In areas where smoking is permitted, don't smoke when walking or riding in the forest and be sure your match, cigarette, cigar, or pipe heel is out before you discard it.

6. Never throw lighted smokes out of a car—use the ashtray.

7. Tables, latrines, and shelters are expensive and are for your convenience—don't cut initials or otherwise mutilate or destroy them. Leave them in sanitary condition.

8. Trees, shrubs, and flowers make the area attractive—don't cut or deface trees. Leave flowers for others to enjoy.

9. Don't pollute ground or water. Fish and clothes should not be cleaned in lakes or streams.

10. Observe State and Federal game and fish laws.

11. Discharge of firearms on or adjacent to recreation areas is prohibited.

Special Fire Rules

The national forests are located in 38 States. It would not be practicable to have one set of fire rules because in some portions of the United States fire hazards are explosive during the summer and drastic precautions are necessary. Be sure to check with local forest officers. Check with State officials for State laws.

The following special rules and restrictions are in effect on the national forests, in addition to the general rules.

Northern Rocky Mountains (Montana, northern Idaho, extreme eastern Washington, and northwestern South Dakota):

Campfire permits not required.

Shovel, ax, and water bucket must be carried in your car (usually for period July 20–September 5).

Rocky Mountains (Colorado, Wyoming east of Continental Divide, South Dakota, Nebraska):

No special rules.

Campfire permits not required.

Southwest (Arizona and New Mexico):

No special rules.

Campfire permits not required.

Intermountain (Utah, Wyoming, west of Continental Divide, southern Idaho, Nevada, and narrow strip of eastern California from Lake Tahoe south):

No special rules.

Campfire permits not required, except in California portion of Toiyabe National Forest.

California:

Campfire permits required for any fire, including campfires at regular Forest Service campgrounds, and including gasoline stoves, even if inside a trailer.

Open campfires are prohibited in southern California (Angeles, Cleveland, San Bernardino, and Los Padres National Forests). Fires may be built only in camp stoves.

Pacific Northwest (Oregon and Washington):

Campfire permits required on most national forests except at regular campgrounds which are posted "Campfire permits not required on this campground."

Northern Atlantic States (Maine, New Hampshire, Vermont, Pennsylvania, Virginia, West Virginia, and Kentucky):

Campfire permits required except at regular established camp and picnic areas.

Smoking prohibited in high hazard areas of forests.

Southern Atlantic and Gulf States (North Carolina, South

Carolina, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, and Oklahoma):

No special rules.

Campfire permits not required.

Lake States and Central States (Minnesota, Wisconsin, Michigan, Ohio, Illinois, Indiana, Missouri):

Campfire permits not required.

Suggested Rules of Conduct

In addition to the general and special rules the Forest Service suggests the following rules of conduct as the mark of a good camper, picnicker, and recreationist:

1. Leave a clean, neat camp—just like you'd like to find it. Burn papers and boxes. Put cans and trash in garbage pits or cans.

2. When in recreation areas keep your car on the roads and parking areas.

3. When putting out fires in prepared fireplaces, be careful not to pour water directly on the hot rocks or fire brick—they crack.

4. Don't try to burn wet garbage—usually it doesn't burn completely and leaves a mess for the next camper.

Put it in garbage pit or can.

5. If you plan to go on a hiking trip into the back country, get reliable maps and good shoes. Let the ranger know where you are going and when you get back.

6. Carry a shovel, ax, and water bucket in your car—in case of fire.

7. Be cautious about drinking water from streams. Clear water may be polluted and dangerous to drink.

8. When camping away from improved areas, bury at least 100 feet from running water all garbage and refuse that you cannot burn; and always be sure your fire is out. Stir the coals while soaking them with water. Turn charred sticks and drench both sides.

Thousands of inquiries concerning places to go, things to see, and recreational opportunities offered in the national forests are directed to the United States Forest Service each year. The number of such inquiries is steadily increasing.

In response to this public demand the following tabulation has been prepared giving the name and location of national forests with individual thumbnail sketches of special features, recreation resources, and accommodations.

F-386

Ripe timber is sold for cutting under practices that insure sustained production, also protection of recreation and scenic values.—Superior National Forest, Mi

National Forests of the United States

NATIONAL-FOREST GUIDE

ALABAMA

NAME, HEADQUARTERS, AND ACCESS HIGHWAYS	SPECIAL FEATURES	RECREATION RESOURCES	RECREATION FACILITIES AND ACCOMMODATIONS
William B. Bankhead , Montgomery. (Ranger headquarters at Haleyville and Double Springs.) U S 31, 78; State 5, 74.	Limestone gorges, Clear Creek Falls, two natural bridges, wildlife refuge and management area.	Managed deer, turkey, and squirrel hunting. Bass and bream fishing in Brushy Lake.	Improved picnic areas on Sipsey River and Brushy Lake. Commercial accommodations at Haleyville, Russellville, Decatur, Cullman, and Jasper.
Conecuh , Montgomery. (Ranger headquarters at Andalusia.) U S 29.	Large, clear ponds.	Bass and bream fishing. Deer, turkey, and small-game hunting.	Improved picnic and swimming area at Open Pond. Commercial accommodations at Andalusia.
Talladega , Montgomery. (Ranger headquarters at Centerville, Heflin, and Talladega.) U S 78, 241; State 6.	Payne Lake Wildlife Management Area; Skyway scenic drive; Mount Cheaha, 2,407 feet elevation, highest point in Alabama; Lake Chinnabee.	Deer, turkey, duck, and squirrel hunting; bass, bream, and perch fishing; swimming at Cheaha State Park.	Picnic grounds at Payne Lake and Horn and Horseblock towers. Resort hotel and cabins at Cheaha State Park. Commercial accommodations at Centerville, Marion, Tuscaloosa, Selma, Talladega, Sylacauga, Anniston, and Heflin.

ALASKA

Chugach , Juneau. (Division headquarters, Seward and Cordova.) Plane service to both towns. Highway to Seward.	Tidewater, Hanging, and Piedmont Glaciers. Aleut villages (remote). Picturesque old Russian churches, native bidarkas (boats). Shrimp, crab, clam, and salmon canneries. Alaska railroads. Mountains of the Kenai with road down Kenai Peninsula; scenic fiords of Port Wells.	Striking scenery. Trout and salt-water fishing. Moose, sheep, goat, and brown bear hunting; duck, grouse, and ptarmigan hunting. Hiking along scenic trails; 210 miles of roads, 145 miles of trail.	12 improved campgrounds, 9 shelter cabins, 3 winter sports areas. Plane service to many of these areas. Rail service from Anchorage to Seward.
Tongass , Juneau. (Division and ranger headquarters at Petersburg, Ketchikan, Sitka, and Craig.) Direct plane service to Ketchikan and Juneau.	Salmon canneries. Totems. Territorial museum and Indian villages; gateway to Canadian hinterland and Yukon, "Trail of '98," gold mines. Glaciers, fiords, Alaska Highway from Haines; "Ice Cap" back of Juneau; fiords of Tracy Arm and Rudyerd Bay. Observatories where bear can be watched fishing for salmon.	Trout fishing, also salt-water fishing for salmon and halibut. Alaskan brown and grizzly bear, goat, and deer hunting. Boating on lakes and inland waterways. Hiking scenic wilderness trails; mountain climbing; 210 miles of roads, 420 miles of trails.	5 improved forest campgrounds, 5 winter sports areas, 45 shelter cabins. Hotel accommodations in all southeast Alaska towns, all of which are served by plane.

ARIZONA

NAME, HEADQUARTERS, AND ACCESS HIGHWAYS	SPECIAL FEATURES	RECREATION RESOURCES	RECREATION FACILITIES AND ACCOMMODATIONS
Apache , Springerville. (Forest lies partly in New Mexico.) U S 60, 260, 666.	Scenic Coronado Trail and drives through spruce and mountain-meadow country. Prehistoric Blue River cliff dwellings, Big and Crescent Lakes. Blue Range and Mount Baldy Wilderness Areas.	Lake and stream trout fishing. Big-game hunting, including elk, deer, bear, antelope; turkey hunting. Horseback riding, pack trips.	33 public camp and picnic areas. Resorts, lodges, cabins, and motels. Nearby towns: Springerville, Greer, and Alpine, Ariz.; Luna and Reserve, N. Mex.
Coconino , Flagstaff. U S 66, 89, 89A.	San Francisco Peaks, 12,611 feet, highest in Arizona; Oak Creek Canyon; near Grand Canyon National Park; nearby National Monuments are Sunset Crater, Walnut Canyon (cliff dwellings), Wupatki (ancient ruins), Montezuma Castle and Montezuma Well, Lowell Astronomical Observatory, Museum of Northern Arizona; Sycamore Canyon Wild Area, Meteor Crater, Mogollon Rim drive; more than 1,000 miles of scenic drives through timber.	Hunting, including deer, antelope, turkey, elk, and mountain lion; lake and stream fishing; horseback riding. Red Rock country in vicinity of Sedona offers exceptional photographic scenes. Boating on Lake Mary.	22 improved public camp and picnic areas, Arizona Snow Bowl winter sports area. Resorts, hotels, camps, and dude ranches. Nearby towns: Williams, Sedona, Clarkdale, Cottonwood, Camp Verde, and Winslow.
Coronado , Tucson. (Forest lies partly in New Mexico.) U S 80, 84, 89, 666; State 82, 86.	Rugged mountains rising abruptly from surrounding deserts; cactus to firs and swimming to skiing in an hour's time—40 miles apart. Madera and Sabino Canyons; Santa Catalina, Chiricahua, and Pinaleno Recreation Areas; Chiricahua and Galiuro Wild Areas. Colossal Cave State Park, Saguaro and Chiricahua National Monuments. Only national forest bordering on Mexico.	Excellent hunting for deer, javelina, mountain lion, quail, and dove. Scenic drives and trails in the rugged mountain ranges of southern Arizona. Dude ranch country. Rare plants, birds, and animals. A paradise for naturalists, birders, and botanists.	38 public camp and picnic areas; southernmost winter sports area in the United States. Many dude ranches, resorts, and hotels. Nearby towns: Tucson, Benson, Patagonia, Tombstone, Willcox, Safford, Bisbee, Bowie, San Simon, and Ft. Huachuca, and the Mexican border towns of Douglas, Naco, Nogales, and Sasabe.
Kaibab , Williams. U S 66, 89, 64, 67.	Grand Canyon National Game Preserve with the famous Kaibab forest deer herd, wild buffalo herd, only habitat of the Kaibab squirrel. Access to both North and South Rims of the Grand Canyon and Supai Indian village in Havasu Canyon. East Rim, North Canyon, Thunder River, Bill Williams Mountain, and White Horse Lake. Sycamore Canyon Wild Area.	Hunting, including deer, elk, antelope, bear, mountain lion, turkey, and buffalo. Wilderness trips, scenic drives, fishing, riding and pack trips. Unlimited photographic opportunities in vivid coloring and geological formations.	5 public camp and picnic areas. Hotels, resorts, cottage courts, guest ranches, hunting camps. Nearby towns: Williams, Grand Canyon, Flagstaff, Jerome, Ashfork, Fredonia, and Cottonwood, Ariz.; Kanab, Utah.

NAME, HEADQUARTERS, AND ACCESS HIGHWAYS	SPECIAL FEATURES	RECREATION RESOURCES	RECREATION FACILITIES AND ACCOMMODATIONS
Prescott, Prescott. U S 89.	Rugged back country in the high mountains; Granite Basin Lake with rugged Granite Mountain overlooking the lake. Sycamore Canyon and Pine Mountain Wild Areas. Prescott is known as the "Cowboy Capital of the World" and the Home of "Smoki People." Jerome (ghost town).	Deer and antelope hunting; some fishing; dove and quail hunting; many horse trails, scenic drives.	10 public campgrounds and picnic areas, 2 winter sports areas. Resorts, hotels, cabins, and dude ranches. Nearby towns: Prescott, Mayer, Jerome, Clarkdale, and Cottonwood.
Sitgreaves, Holbrook. U S 60; State 77, 173.	Scenic Mogollon Rim drive; Pueblo ruins; large elk herd.	Limited hunting including deer, turkey, antelope, bear. Saddle and pack trips.	2 forest campgrounds. Resorts, hotels, cabins, and guest ranches. Nearby towns: Winslow, Show Low, Lakeside, and Pinetop.
Tonto, Phoenix. U S 60, 70, 80, 89.	Semidesert to pine-fir forests, elevations 1,500 to 8,500 feet. Famous Tonto Basin, Superstition Mountains, and Mogollon Rim. Superstition Mountain and Mazatzal Wilderness Areas; Sierra Ancha Wild Area. Roosevelt, Apache, Canyon, and Stewart Mountain Lakes on the Salt River; Bartlett and Horseshoe Lakes on the Verde River. Many remains of prehistoric occupancy, including Tonto National Monument and Pueblo Canyon ruins. Varied and colored topography.	Lake and warm water stream fishing. Deer, elk, bear, peccary, turkey, and mountain lion hunting. Saddle and pack trips, winter photographic possibilities. Scenic drives: Apache Trail and forest highway from Payson to Mogollon Rim via Colcord Mountain.	18 public camp and picnic areas. Resorts, dude ranches, cabins, hot mineral baths, boats with or without motor, winter and summer open playgrounds. Nearby towns: Payson, Pine, Young, Roosevelt, Mesa, Globe, Miami, and Superior.

ARKANSAS

Ouachita, Hot Springs National Park. (Forest lies partly in Oklahoma.) U S 70, 71, 270, 271; State 7.	Ouachita, Kiamichi, and Winding Stair Mountains. 8 major and numerous smaller artificial lakes in or near forest. Caddo Gap, where De Soto fought Indians; explored by LaSalle and De Tonti, accounting for the many French names. Crystal Cave, Little Missouri Falls, four game refuges, medicinal springs.	Bass fishing; deer, quail, and squirrel hunting; scenic drives, hiking, and swimming.	14 improved forest camp and picnic grounds, with overnight shelters at 4 areas. Commercial hotels, resorts, and cabin camps in and near the forest. Nearby towns: Hot Springs National Park and Mena, Ark.; Poteau and Heavener, Okla.
Ozark, Russellville. U S 64, 71; State 22, 7.	Inviting summer climate, oak forest, scenic drives, 5 game refuges. 3 recreational lakes; Mt. Magazine.	Stream and lake fishing, deer and small game hunting, swimming, scenic drives.	16 improved camp and picnic areas. Mt. Magazine Lodge and cabins, White Rock Mountain cabins, commercial cabins nearby. Nearby towns: Ft. Smith, Fayetteville, Ozark, Clarksville, and Harrison.

CALIFORNIA

NAME, HEADQUARTERS, AND ACCESS HIGHWAYS	SPECIAL FEATURES	RECREATION RESOURCES	RECREATION FACILITIES AND ACCOMMODATIONS
Angeles , Los Angeles. U S 6, 66, 99.	Steep, rugged mountains adjoining Los Angeles metropolitan area; Old Baldy, 10,000 feet. Chiefly a chaparral forest that serves as a watershed for the Los Angeles area and as an easily reached mountain playground for the area's inhabitants. Devil Canyon, Bear Canyon, Wild Area.	Scenic drives with wonderful views, especially of city lights at night. Riding and hiking trails, winter sports, fishing and hunting, some swimming and boating.	42 improved forest campgrounds, 5 winter sports areas, ski lifts and tows. Resorts, cabins, pack and riding stables. Hotels and motor courts in Los Angeles and foothill towns.
Cleveland , San Diego. U S 101, 395, 80; State 78, 94.	Primarily a watershed forest with an unusually mild climate, between the desert and the sea. Agua Tibia Wild Area. The world's largest telescope at Palomar Observatory.	Camping; warm water fishing and duck hunting on the impounded lakes of the water systems. Big-game hunting is confined to a deer season of 1 month during which there is heavy competition; pigeon and quail hunting. The first day's ride on the Mexico to Oregon Trail crosses the forest.	17 improved forest campgrounds, 1 winter playground. Resorts with cabins, and dude ranches nearby. The cities of San Diego and Santa Ana are less than 2 hours' drive from the forest.
Eldorado , Placerville. (Forest lies partly in Nevada.) U S 50; State 88.	Rugged mountains in Sierra Nevadas. Hundreds of mountain lakes; includes south end of Lake Tahoe, 23 miles long, 13 miles wide, elevation 6,225 feet. Famous early day mining communities, including Coloma, site of Sutter's mill where discovery of gold started the rush of 1849.	Lake and stream fishing, deer and bear hunting. Scenic drives: Highway 50 to Lake Tahoe, Carson Pass Highway 88 famous for Fremont expedition in 1844 led by Kit Carson. Georgetown to Wentworth Springs. Riding trails, wilderness trips.	29 improved forest campgrounds, 7 winter sports areas. Resorts, hotels, cabins, and dude ranches. Nearby towns: Sacramento, Calif., Reno, Nev.
Inyo , Bishop. (Forest lies partly in Nevada.) U S 6, 395; State 168.	High Sierra Wilderness Area and Mt. Dana-Minarets Wild Area. Palisade Glacier, southernmost glacier in the United States and largest in Sierra Nevadas. Mt. Whitney, highest point in continental United States; rugged and spectacular back country with many peaks more than 14,000 feet in elevation.	Lake and stream fishing, deer hunting, wilderness trips. Many natural lakes, some accessible by paved road up to 9,700 feet in elevation. Mammoth and Reversed Creek Recreation Areas.	54 improved forest campgrounds, 7 winter sports areas, resorts, cabins. Nearby towns: Lone Pine, Independence, Bigpine, Bishop, Leevining.
Klamath , Yreka. (Forest lies partly in Oregon.) U S 99; State 96.	Klamath River and tributaries, famous for salmon and steelhead trout. Marble Mountain and Salmon-Trinity Alps Wilderness Areas. High mountain lakes and streams.	Steelhead and salmon fishing, deer hunting, hiking, riding, pack trips.	21 improved forest campgrounds; commercial cabin camps, resorts, and dude ranches.
Lassen , Susanville. U S 395; State 36, 89.	Caribou Peak and Thousand Lakes Wild Areas. Many lakes; southern end of Cascade Wonderland; volcanic lava flows and craters; ice caves, lava flow tubes, hot springs, mud pots. Indian pictographs and hieroglyphics, old emigrant trails.	Lake and stream fishing for rainbow, Lochleven, and steelhead trout; deer and bear hunting; riding and hiking trails; scenic road over Mt. Lassen crosses through Lassen National Park.	52 improved forest campgrounds; 1 winter sports area; privately operated resorts, hotels, cabins. Nearby towns: Susanville, Westwood, Chester, Chico, Red Bluff, Redding, Burney, Fall River Mills, McArthur, and Stirling City.

FILMS AVAILABLE

REALM OF THE WILD. (Color; released 1945. 27 minutes.)

One-third of all our big-game animals and myriad smaller animals and birds claim the National Forests as their home. This picture shows many of them in their natural haunts. It also shows that the area of land and its capacity to produce food for wildlife are both limited. For this reason wildlife populations must also be limited—kept in proportion to the land's productive capacity.

SNOW RANGER. (Color; also b/w; released 1951. 15 minutes.)

National Forest ski areas furnish low cost, wholesome winter recreational opportunities for the expert and the beginner. This film shows how the Snow Ranger, official representative of the Forest Service, works tirelessly in cooperation with the National Ski Patrol for the enjoyment and safety of thousands of winter sports enthusiasts. It portrays facilities available on some of the most popular

ski areas in the United States, a brief session with a skiing class, and how skiers are safeguarded from their own errors. TV.

WOODLAND MANNERS. (Color; also b/w; released 1952. 19 minutes.)

Millions of people visit the National Forests each year—for recreation, sport, rest, and relaxation. The recreation areas on these forests are of inestimable value, but they must be kept sanitary, attractive, and serviceable to remain that way. This picture shows that it is up to

everyone who visits the National Forests to observe the necessary sanitary measures, to be careful with fire, to use just plain good American manners, and to leave his picnic spot in as good or better condition than he found it. Only by so doing can we continue to enjoy the swimming, hiking, camping, fishing, hunting, picnicking, and the unsurpassed beauty to be found on our National Forests. TV.

For information on how these films may be obtained contact your County Agent or the nearest Land Grant College.
